OBJECTIVE

A final-year Computer Engineering student with a strong foundation in Machine Learning, full-stack development, and scalable systems. Passionate about building data-driven applications and exploring research-oriented problem solving in AI and cloud computing. Aspiring to pursue a Master's in Computer Science in Germany to advance expertise in intelligent and distributed systems.

EDUCATION

Gujarat Technological University Sep 2022 – May 2026

Bachelor of Technology in Computer Engineering

CGPA: 9.00

Gujarat Secondary and Higher Secondary Education Board Jun 2021 – Mar 2022

Higher Secondary Education – 12th Standard

Percentage: 88.92%

Gujarat Secondary and Higher Secondary Education Board Jun 2019 – Mar 2020

Secondary Education – 10th Standard

Percentage: 87.67%

INTERNSHIPS

Infinite Craze Games Pvt. Ltd. – Machine Learning Intern | Surat, Gujarat Dec 2025 – May 2026

- Evaluated model performance using accuracy, precision, and RMSE to optimize predictive outcomes
- Performed data preprocessing and exploratory data analysis on real-world datasets for predictive tasks
- Developed and validated machine learning models using Python, Pandas, NumPy, and Scikit-learn
- Built end-to-end ML pipelines from data cleaning to model evaluation in production-oriented workflows

Tech Elecon Pvt. Ltd. – React JS Intern | Anand, Gujarat May 2025 – Jun 2025

- Developed a scalable e-learning platform UI (courses, dashboards, multi-page flows) using React.js
- Engineered 30+ reusable components to improve development efficiency and UI consistency
- Implemented responsive design and routing across 10+ pages for cross-device usability
- Utilized React Hooks and Context API for efficient state management and modular architecture

DialogFlows AI – Full Stack Web Development Intern | Anand, Gujarat May 2024 – Jun 2024

- Developed full-stack applications using React.js, Node.js, and Express.js
- Designed responsive UI layouts ensuring accessibility across devices
- Integrated REST APIs and dynamic content rendering for improved interactivity
- Worked with MongoDB and Git/GitHub, strengthening backend and version control practices

PROJECTS

AI-Based Health Prediction System | [GitHub](#) Aug 2025 – Dec 2025

- Developed deep learning models for time-series health prediction using LSTM-based architectures
- Designed personalized health scoring and recommendation system from lifestyle data
- Implemented and trained models in PyTorch, improving predictive performance through model optimization techniques
- Explored advanced architectures (attention mechanisms) for real-world health analytics and intelligent forecasting

Agri-Tech Platform with ML & AI Chatbot | [GitHub](#)

Dec 2024 – Apr 2025

- Built a full-stack agri-tech platform integrating e-commerce functionalities and AI-driven services
- Implemented machine learning models (Random Forest) for crop recommendation and soil analysis
- Integrated AI chatbot and ML pipeline to deliver data-driven agricultural insights and decision support
- Designed scalable backend architecture for handling farmer interactions, product systems, and recommendations

APC Bal Mandal PWA | [Frontend GitHub](#) | [Backend GitHub](#)

Jan 2025 – Apr 2025

- Developed a full-stack Progressive Web App (PWA) to digitize attendance and community workflows
- Engineered secure role-based access control (RBAC) using JWT for multi-user access
- Built real-time features including notifications, dashboards, and media handling with optimized client-server communication
- Deployed a scalable, offline-capable system supporting 100+ active users across devices using MERN stack

RESEARCH PROJECT

Satellite Image Classification | [Report & Analysis \(Google Drive\)](#)

Jan 2025 – Apr 2025

- Applied CNN-based architectures, preprocessing, and optimization techniques to improve model accuracy and spatial analysis
- Processed geospatial and remote sensing data to extract spatial features and meaningful patterns
- Implemented multi-class classification models using Python, Scikit-learn, and TensorFlow/Keras
- Applied machine learning and deep learning techniques for satellite image classification

CERTIFICATIONS

- WEBATHON'24 – 1st Rank (90+ participants)
- Fundamentals of Digital Marketing by Google Learn Digital
- Competitive Programming: 600+ problems (300+ LeetCode), CodeChef 2★
- Entrepreneurship by National Programme on Technology Enhanced Learning (NPTEL)
- Human Computer Interaction by National Programme on Technology Enhanced Learning (NPTEL)
- Advanced Distributed Systems by National Programme on Technology Enhanced Learning (NPTEL)

LEADERSHIP & ACTIVITIES

- **Vice President, CodeChef BVM Chapter** (Nov 2024 – Oct 2025) - Led technical initiatives; increased participation by 2×
- **Event Manager, Microsoft Learn Student Chapter** (Dec 2023 – Aug 2024) - Organized coding contest & full-stack workshop (200+ students)
- **Volunteer, BAPS Bal Mandal** (Aug 2018 – Present) – Led social initiatives impacting 1,000+ participants
- **Technical Engagement** – HackOut'24 Hackathon; events in blockchain, cloud computing, and AI/ML

SKILLS

- **Programming Languages:** C, C++, Java, Python, JavaScript, PHP
- **Data Structures & Algorithms:** DSA, Competitive Programming
- **Machine Learning:** CNNs, Model Training, Pandas, NumPy, OpenCV
- **Frameworks/Libraries:** TensorFlow, Keras, Scikit-learn, React.js, Node.js, Express.js, Flask
- **Systems:** Distributed Systems, Scalability, Concurrency, Fault Tolerance
- **Databases:** MongoDB, MySQL, Appwrite
- **Web & Backend:** REST APIs, JWT Authentication, Role-Based Access Control (RBAC), API Design
- **Cloud & Deployment:** Vercel, Gunicorn, Cloudinary
- **Frontend:** Tailwind CSS, Bootstrap, Redux, Chart.js, Framer Motion, CKEditor
- **Tools:** Git, GitHub, Visual Studio Code, Postman
